Auto Print Feature

Understanding of the feature User Guide

Blue STOK

With Blue STOK, take control over your logistics and always be one step ahead thanks to data synchronized in real time with your operations and usage. All the features needed to streamline your operations are there: set minimum stock holding and re-order level per item, assign preferred suppliers, create purchase orders, report inventory, receive deliveries and attach delivery notes and certificates, and much more. Today, we are going to focus on the Auto-Print feature.

What is the Auto Print feature?

If you turn on the Auto Print feature and a technician removes a part and specifies it in the JobCard, every 40 seconds the system checks if a new part is added to the inventory and automatically prints the label out.

Benefits of the feature:

-Time-saving

-Human error-risk minimizing

-Always up-to-date

Requirements:

The hangar's computer needs to be connected to Blue EYE and the label printer.

While using the iPad, the technician has to select the re-insert in stock option when he removes a part from the aircraft.

Guide:

• First of all, open Blue STOK and go to the inventory status.

• Select inventory items.

• Once the inventory status is open, the Auto Print button will appear on the top left-hand corner.

- There are several options. You can choose to print your label for all the inventories ("auto print all") or select the relevant inventory.
- To do so, you have to click on the button and select the corresponding option.

MRX Systems – Maintenance & Operations Software Solutions

• The auto print mode is activated when the button turns into yellow.
